Mule Surpasses One Million Downloads Milestone

SAN FRANCISCO--(BUSINESS WIRE)--MuleSource (www.mulesource.com), the leading provider of open source infrastructure and integration software, today announced that Mule has surpassed the one million downloads milestone. Following an initial open source release in 2003 by creator Ross Mason, Mule has become the enterprise developer's most-used integration platform, and is currently deployed in more than 1,000 production environments worldwide. A partial list of Mule users and customers can be found at <http://www.mulesource.com/customers/>.

"The explosion of developer interest around Mule is fantastic," said Mason, CTO and co-founder of MuleSource. "It's clear that the open source model works, and that users are seeing real value from the platform. Mule's performance, flexibility, and support for a broad range of technologies are clearly driving benefits for users. We look forward to continued adoption and growth of the Mule user community."

About MuleSource

MuleSource is the leading provider of open source infrastructure and integration software. Founded by the creators of the Mule project, the world's most reliable and widely-used open source ESB and integration platform, MuleSource delivers enterprise class support and services to the hundreds of organizations that have downloaded the open source project worldwide. Founded in 2006 and backed by investors Hummer Winblad Venture Partners, Lightspeed Venture Partners and Morgenthaler Ventures, MuleSource is headquartered in San Francisco with offices worldwide.
